Mental Health Facts

**CHILDREN & TEENS**

**Fact:** 1 in 5 children ages 13-18 have, or will have a serious mental illness.¹

- **20%** of youth ages 13-18 live with a mental health condition¹
- **11%** of youth have a mood disorder¹
- **10%** of youth have a behavior or conduct disorder¹
- **8%** of youth have an anxiety disorder¹

**Impact**

- **50%** of all lifetime cases of mental illness begin by age 14 and 75% by age 24.¹
- The average delay between onset of symptoms and intervention is 8-10 years.¹
- **10 yrs**
- **50%** Approximately 50% of students age 14 and older with a mental illness drop out of high school.²
- **70%** 70% of youth in state and local juvenile justice systems have a mental illness.¹

**Warning Signs**

- Feeling very sad or withdrawn for more than 2 weeks (e.g., crying regularly, feeling fatigued, feeling unmotivated).
- Trying to harm or kill oneself or making plans to do so.
- Out-of-control, risk-taking behaviors that can cause harm to self or others.
- Sudden overwhelming fear for no reason, sometimes with a racing heart, physical discomfort or fast breathing.
- Not eating, throwing up or using laxatives to lose weight; significant weight loss or gain.
- Severe mood swings that cause problems in relationships.
- Repeated use of drugs or alcohol.
- Drastic changes in behavior, personality or sleeping habits (e.g., waking up early and acting agitated).
- Extreme difficulty in concentrating or staying still that can lead to failure in school.
- Intense worries or fears that get in the way of daily activities like hanging out with friends or going to classes.

**4 Things Parents Can Do**

- Talk with your pediatrician
- Get a referral to a mental health specialist
- Work with the school
- Connect with other families

**Suicide**

- **3rd** Suicide is the 3rd leading cause of death in youth ages 10 - 24.¹
- **90%** 90% of those who died by suicide had an underlying mental illness.¹
